

COVID-19

High-performance reagents suitable for COVID-19 research and detection

GRS VIRAL DNA/RNA PURIFICATION KIT

- Column based RNA purification from Sputum and viscous nasopharyngeal/oropharyngeal/tracheal aspirates, as well as from swab samples.

CAT.NR.	SIZE
GK12.0100	100 preps

XPERT ONE-STEP FAST PROBE

- Fast and sensitive detection and quantification using RT-qPCR
- High efficiency in multiplex applications
- Compatible with WHO and USCDC primers/probes

Now available in bulk (50mL and 500mL)

CAT.NR.	SIZE
GE50.0100	100 rxn
GE50.0005	5mL (bulk)
GE50.0050	50mL (bulk)
GE50.0500	500mL (bulk)

XPERT qDETECT COVID-19

- Detection of SARS-CoV-2 by qRT-PCR based on N1, N2, RP primers/ probes (RUO)
- Human specimen and SARS-CoV-2 controls included
- Supplied in small aliquots for reduced contamination risk

CAT.NR.	SIZE
GDK99.3100	~100 samples
GDK99.3500	~500 samples

Prior to placing an order, it is highly recommended to contact us regarding stock availability and lead times.
