Xpert Fast SYBR (uni) BLUE

The ultimate qPCR performance using intercalating dye, resulting in excellent signal with extreme sensitivity.

Reduce pipetting mistakes with the help of the included Blue dye, for easy visual aid.

GE22.5100
5x 1mL

Xpert Fast PROBE (uni) BLUE

Achieve reproducible qPCR performance on probe based assays, with excellent GC/AT-rich amplification and efficient multiplexing.

Reduce pipetting mistakes with the help of the included Blue dye, for easy visual aid.

GE32.5100
5x 1mL

Xpert Fast HRM

Take advantage of the excellent signal of Xpert Fast HRM with low PCR inhibition and achieve ultra-sensitive melt profiles.

Suitable for both standard and fast cycling, and specially designed for SNP genotyping and CpG methylation analysis.

GE70.5100
5x 1mL

Promotion valid for cat.nrs GE22.5100, GE32.5100, and GE70.5100, presented as 5x 1mL aliquots of product. This promotion is not valid in conjunction with other promotions or special prices.
